ABOUT US

PUSHING BOUNDARIES WITH
HAPTIC TECHNOLOGY

D-BOX has been redefining entertainment experiences for more than 20 years through highly precise and immersive haptic technology that provides feedback to the entire body and that sparks the imagination with motion. Through a unique combination of movements, vibrations and textures, D-BOX goes beyond sight and sound to bring movies, TV series and other forms of entertainment to life!

D-BOX uses haptics—the science of transmitting and understanding information through the sense of touch—to further immerse users in their TV shows, movies and more; revolutionizing their listening and viewing experience forever.

WHY CHOOSE **D-BOX**

BRING MOVIES,
SERIES AND ENTERTAINMENT
TO LIFE WITH D-BOX

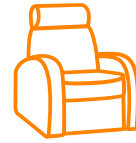

D-BOX's unique combination of high-fidelity movements, vibrations and textures is perfectly synchronized to the action on-screen, plunging you right into the heart of the action!

This added layer of immersion provides you with a new way to experience your favorite content, whether it be movies, TV shows, music, relaxation clips and more! It's also proven to heighten and amplify your emotions, making you feel as if you were truly part of the action. Plus, you can customize the intensity of the feedback in the HaptiSync app—giving YOU total control over your experience!

FEEL EVERY
MOMENT

IN SHORT,
D-BOX
MOVES
YOU BY...

Bringing the movie theater experience to your home.

Immersing you in your entertainment and amplifying your emotions with movements, vibrations and textures perfectly synchronized to the action on-screen.

Allowing you to control your experience and customize the intensity.

Being compatible with your favorite movies, TV shows and more.

+

+

MOVEMENTS

Move either forwards, backwards, left or right, up and down (or a combination of these) with the action on-screen.

VIBRATIONS

Enhance every moment and every emotion with rapid yet subtle movements that add realism to your entertainment.

TEXTURES

Feel if a car is driving on grass or pavement, if a character is jumping or walking, and any other change in surface texture.

HOW THE MAGIC HAPPENS

D-BOX's 1.5" actuators are seamlessly integrated under your home entertainment seat and wirelessly communicate with the HaptiSync Hub, allowing the Hub to determine the content being played via our patented audio recognition technology and to then send the proper haptic track back to the actuators. This is what results in you feeling as if you're in a boat in the harbour, as if you're behind the wheel of a fast car or as if you're being lifted up full throttle at the hands of a maverick pilot!

D-BOX's haptic feedback is also compatible with the technology you already use, such as your favorite movie, TV and music streaming services and cable TV.

With more than 65,000 unique haptic effects encoded by our haptic designers (often in collaboration with the movie directors, Hollywood studios and gaming studios themselves), each sensation is meticulously selected to make your experience as immersive as possible.

All of these effects enhancing your content are at the tips of your fingers thanks to your D-BOX Connect Subscription—making it easier than ever to be blown away by all your favorite movies, TV series and more!
